Physical Activity readiness Questionnaire (PAR – Q)

<i>Name:</i>			<i>Date:</i>		
<i>D.O.B:</i>	<i>Age:</i>	<i>Tel. No:</i>	<i>Wk. Tel. No:</i>		

Regular exercise is associated with many health benefits, yet any change of activity may increase the risk of injury. Completion of this questionnaire is a first step when planning to increase the amount of physical activity in your life. Please read each question carefully and answer them honestly by circling “YES” or “NO”:

YES	NO	<i>1) Has a physician ever said you have a heart condition and you should only do physical activity recommended by a physician?</i>
YES	NO	<i>2) When you do physical activity, do you feel pain in your chest?</i>
YES	NO	<i>3) When you were not doing physical activity, have you had chest pain in the past month?</i>
YES	NO	<i>4) Do you ever feel a loss of consciousness or do you lose your balance because of dizziness?</i>
YES	NO	<i>5) Do you have a joint or bone problem that may be made worse by a change in your physical activity?</i>
YES	NO	<i>6) Is a physician currently prescribing medications for your blood pressure or heart condition?</i>
YES	NO	<i>7) Are you pregnant?</i>
YES	NO	<i>8) Do you have insulin dependent diabetes?</i>
YES	NO	<i>9) Are you 69 years of age or older?</i>
YES	NO	<i>10) Do you know of any other reason you should not exercise or increase your physical activity?</i>

If you have answered “YES” to any of the above questions, please check with your doctor BEFORE you become more physically active.

If you honestly answered “NO” to all the questions you can be reasonably positive that you can safely increase your level of physical activity *gradually*.

If your health changes so you then answer “YES” to any of the above questions, seek guidance from a physician and notify reception or our Leisure Centre Manager.
